Expanded VMS Exploration Program

February 17, 2005.

TSXV: RJK.SV.A

Kirkland Lake, Ontario. RJK Explorations Ltd. "RJK" and GLR Resources Inc. "GLR" continue to explore its 100% owned 13,000 acre base metal property located in Aldina, Marks, Sackville and Adrian Townships 65 kilometres west of Thunder Bay, Ontario.

Historic exploration efforts by RJK/GLR through airborne and ground geophysical surveys, geological mapping, soil and till geochemistry, in conjunction with additional till and soil sampling completed last fall, has identified a new area of exploration interest north, north-west of the Companies 1991 bedrock base metal discovery. This area lies within felsic strata which may be parallel or the folded extension of the felsic unit hosting the 1991 discovery.

Approximately twenty five kilometres of line cutting and time domain IP geophysical surveying is currently being completed in this area to define airborne EM and other geophysical targets.

RJK/GLR has successfully traced a high-grade polymetallic boulder train back to its source resulting in a bedrock discovery on the property. Other glacial boulder debris containing high-grade base and precious metal values are also located on the property.

The Companies are continuing a systematic exploration program to seek their source.

Julius Hava B.A.,B.Sc.,P.Geo a qualified person under National Instrument 43-101 has read and approved the contents of this news release.

Safe Harbour - Certain statements in this document constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company, to be materially different from any future results, performance or achievements expressed by such forward-looking statements. Such factors include, among others, that exploration works may not be continually successful as there is never a guarantee of economic or profitable outcomes with exploration works; that exploration companies may have a history of operating losses and no guarantee of future profitability or access to additional capital; that exploration companies may face environmental liability and insurance claims; and may be dependent or be subject to conflicts with joint-venture partners, should the company profiled herein seek such a partner."
