Drill Rig Mobilized to RJK Explorations' Dorion South Platinum/Palladium Cu Ni Project in the Thunder Bay North Camp

KIRKLAND LAKE, ONTARIO - July 8, 2009 - **RJK Explorations Ltd.** (the "Company") (TSX VENTURE: **RJX.A**) announces that it has mobilized a drill rig to its Dorion South Platinum/Palladium Cu Ni Project in the Thunder Bay North Camp.

RJK has also completed 2D Magnetic Modeling to selected VTEM Airborne data of the two airborne surveys flown earlier this year over the Dorion South Project area. This modeling will aid in the selection and orientation of the drill hole locations to the anomalies indicated by the airborne geophysical results.

RJK continues to evaluate a number of other precious metal projects which have been presented to the Company recently and is fully prepared to acquire new projects if these evaluations are positive.

Forward Looking Statements: This news release contains certain forward-looking statements. These forward-looking statements are subject to a variety of risks and uncertainties beyond RJK's ability to control or predict which could cause actual events or results to differ materially from those anticipated in such forward-looking statements. Although RJK believes that the assumptions inherent in the forward-looking statements are reasonable, undue reliance should not be placed on these forward-looking statements.
